SUMMARY

Software Engineer with **+10 years** experience in .NET, specialized in **backend development** and **AWS Solutions**.

I'm passionate about software development, I enjoy constantly **learning new technologies** and testing them in personal side projects.

WORK EXPERIENCE

2020 – current **SENIOR .NET SOFTWARE DEVELOPER**

Ohpen

I focused on developing scalable and decoupled banking services using the .NET within AWS.

Responsibilities:

- Design, develop, and deploy microservices on the AWS cloud platform, enhancing the banking services' efficiency and reliability.
- Refactor and optimize existing features into scalable and cost-effective AWS cloud microservices.
- Spearheaded ETL processes to streamline data integration and analysis.

2019 – 2020 **SENIOR .NET SOFTWARE DEVELOPER**

WinSystems

Working on .NET technologies for desktop applications & Restful API, following an agile methodology.

Responsibilities:

- Develop new features with clean architecture & clean code using SOLID, DRY principles and DI.
- Maintain legacy code.
- Team management tasks and ensure the application of agile methodologies.

2015 – 2019 **SENIOR .NET SOFTWARE ENGINEER**

Carglass Spain (First year as IT ETICS Sistemas consultant)

Working on .NET technologies for desktop applications &

COURSES

2023 - Apache Kafka
2022 - Terraform Associate
2021 - AWS Serverless
2019 - Flutter
2017 - VueJS Framework
2016 - Python-Flask
2016 - Agile Course
2015 - Domain-Driven Design
2014 - MeteorJS Framework
2013 - Android Development
2011 - CCNA Cisco

TECHNOLOGY SKILLS

Languages

C#
Python

Frameworks

.NET Framework
.NET Core

Flask
Flutter
VueJS & AngularJS

DataBases

MySQL
Oracle
SQL Server
PostgreSQL
MongoDB

Operating Systems

Windows systems
GNU/Linux
Mac OS

IDE

Rider / MS Visual Studio
VIM
VS Code

Restful API, following an agile methodology.

Responsibilities:

- Maintain legacy code, design and implement new features.
- Collect requirements from BA, develop solutions matching QA expectations and closely interact with both teams.
- Technical designs, documentation and knowledge sharing articles.
- Train other team members.

2011 – 2015

FULLSTACK DEVELOPER

JG Ingenieros

Working as an Analyst & Developer for web & desktop logistic applications (MVVM & MVC 4).

Responsibilities:

- Analyse and resolve technical and application problems.
- Develop, refine and tune integrations between applications.
- Focus on depth of knowledge and expertise in a certain language.

2010 – 2011

DEVELOPER (INTERSHIP)

DOW Chemical Ibérica S.L

COURSES

2023

Apache Kafka for absolute beginners

Apache Kafka Ecosystem, Architecture, and Client API Programming and streams transformations..

2022

HashiCorp Certified: Terraform Associate

Understanding the basics of Infra as Code technologies, and then begin a deep dive journey into Terraform.

2021

AWS Serverless Microservices with Patterns & Best Practices

AWS Event-driven Serverless Microservices using AWS Lambda, API Gateway, EventBridge, SQS, DynamoDB and CloudFormation for IaC.

2019

Flutter Development Bootcamp with Dart

2017

VueJS Framework

2016

Certificate of The Scrum & Scrum Master

2015

Domain-Driven Design Fundamentals

SKILLS

Personal

Critical Thinking
Flexible
Team Player
